

How To Search And Download Using Divar MR

Please note: Use DVD+/-R disks only
(DVD RW disks are not compatible)

- Right click the mouse anywhere on the screen to bring up the System Control Bar.
- Left click on the icon that looks like a magnifying glass (this is the second icon in on the top left).
- Enter the start Date and Time on the left hand side of the screen (left click a box to highlight then use the left mouse key to go down through the numbers and the right key to go up through the numbers).
- Left click on the Update box.
- Choose which camera/cameras you would like to view by left clicking on the list of camera numbers.
- Left click on the play box.
- You can control the Forward, Rewind, Pause, Stop & Play functions by left clicking the icons on the System control bar.
- By pressing the Stop icon you can return to the search menu.
- When you have the start and stop times needed to be copied left click the stop icon.
- Next click the exit box at the bottom right of the screen.
- Open the DVD tray by first pressing the Alt button on the front of the DVR then press the no.1 on the front of the DVR, the tray will open put the DVD into the tray, press the Alt button then the no.1 to close.
- Left click the icon that looks like an old piece of movie film (this is the icon on the far right of the top line).
- Enter the start date/time then enter the end date/time and click on the cameras to be copied.
- Left click on the export box.
